

VS-550R

Phoenix Dictation Server

what it is

The VS-550R is the most popular model in the Phoenix Dictation Server product line. It comes with the Phoenix Core Dictation software already installed and Microsoft Windows fully configured for optimal performance.

Everything you need is provided with the server. In addition, you can have confidence that your data is always safe with two mirrored (RAID 1) drives. A third drive holds a backup of your data that is made each night using the Windows Backup feature.

We realize it takes time to learn a new software suite, so our techs are available to help you with installation and configuration every step of the way.

Make your dictation and transcription solution the Phoenix VS-550R!
